Subject: Sewer work starting

Hi Amy
Yes the track # 50666 for subdivision. We are starting on Monday 11/18/19 installing the sewer mains for the lots 12 to 23 . And will be starting water and storm line after this Is done. This work will cause us to close down some of the trails to do this work . And at some point all of the trails that are around our driving range. When this work starts the trails around the driving range could be close for some time in till work is completed.

The work is to include all of the storm line needed. All of the sewer and water lines needed.
And Constuction of new walking trails and bike paths. All the landscaping needed and fencing.
Once we are done it will reopen to new walking trails and bike paths and new landscaping.
Attached is the permit for the sewer work. We will have the rest of the permits for all of the other work soon.
I hope this helps if you need anything else please let me know.

Thank you Scott Campbell
